Lucas Nunes

UX/UI Designer · Front-end · Lisbon

Portfolio: lucasnunespt.github.io kaullyano@gmail.com linkedin.com/in/lucasnunespt
Lisbon · open to junior UX/UI roles

Junior UX/UI designer grounded in **neuroscience and front-end**. I design and build calm products: I created **NeuroMedit**, a live meditation platform, and **The Consciousness System**, an interactive e-book in four languages. Today I support an airline's customers in **Spanish, English, Italian and Portuguese**, which puts me in daily contact with real user problems.

DESIGN PROJECTS

NeuroMedit · founder and designer — 2025 – present

Own product, live at neuromedit.com

- Research, scripts, **visual system and front-end** for a guided meditation platform.
- A choice-free entry: the product starts with a breath, for people who arrive tired.
- Usability test with real users: thumb zone, CTA hierarchy, audio delay.

The Consciousness System · concept and design direction — 2026

Interactive neuroscience e-book · working prototype

- A solar-system map, **4 languages** picked automatically, read-aloud and a calm mode.
- **I directed the AI (Claude)** that wrote the code: I defined, tested on phones and corrected every version.

Portfolio and personal design system — 2026

- Visual identity, tokens, accessibility (contrast, keyboard) and a site in 4 languages.

EXPERIENCE

Multilingual customer support · Vueling project — Sep 2026 – present

Concentrix · Lisbon

- I support Spanish customers all day: I listen to the problem and solve it with them.
- Calls in **Spanish, English, Italian and Portuguese**; multinational team working in English.

Customer Experience & Operational Support — 2023 – 2025

Poke House · Lisbon

- High-volume service: reading people in seconds and solving on the spot.

EDUCATION

BSc in Software Development

IADE – Universidade Europeia · in progress

SKILLS

User research · Wireframes · Prototypes · Usability testing · Design systems · Accessibility · Internationalisation · AI direction

TOOLS

HTML5 · CSS3 · JavaScript · React.js · Git/GitHub · Claude · Canva
